## **DETAILED ACTION**

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John F. McCabe on October 5, 2004.

The application has been amended as follows:

Claims 17 and 18 have been cancelled.

As discussed with Attorney John F. McCabe, claims 17 and 18 failed to further limit the claim from which they depended.

## Allowable Subject Matter

Claims 8-16 are allowed.

The following is an examiner's statement of reasons for allowance: The affidavit filed July 12, 2004 is sufficient in overcoming the rejections based on Nagamatsu et al. Additionally, applicant's arguments were sufficient in overcoming the rejections based on Yoshida in view of Finnemore. Specifically, there would be no reasonable

Application/Control Number: 09/885,471

Art Unit: 1762

expectation of success in substituting MgB<sub>2</sub> for the oxide superconductors in Finnemore. This is particularly true in view of Satou et al. (US 4,657,774), which teaches a laser evaporation method where MgB<sub>2</sub> is used as the target, but MgB<sub>2</sub> layers are not formed, and also the knowledge one of ordinary skill in the art would have that laser evaporation of materials requires a specific wavelength and energy density that is dependant on the material of the target and that wavelengths and energy densities capable of evaporation do not necessarily exist, or are achievable, for all target materials.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric B Fuller whose telephone number is (571) 272-1420. The examiner can normally be reached on Mondays through Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive P Beck, can be reached on (571) 272-1415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
